DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
1. Claims 1, 2, 7, 8, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beller (WO 9608227) in view of Hurlimann (US 3860218). Beller discloses a syringe to syringe mixing apparatus comprising an elongate body 3, a mixing element 4 and an enlarged mixing chamber between the nozzle and the syringe receiving portion, a first syringe 1, and a second syringe 2 that are received in the elongate body. Beller discloses a flow modifying element 4.
2. Claim 1 differs from Beller in calling for a nozzle to increase flow velocity and a pair of mixing chambers. Hurlimann teaches a device for mixing including a nozzle 25 that increases the velocity of the fluid flowing therethrough and two mixing chambers 2, 3, one on either side of the nozzle. Hurlimann teaches that the mixing device is for use with two pressure cylinders which use pistons to force the fluid through the nozzle. Syringes are essentially pressure cylinders. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Beller to include the nozzle and mixing chambers as taught by Hurlimann to provide efficient and complete mixing to multiple components.
3. Regarding claim 7, Hurlimann teaches that the passageway has a first flow area 3 and the nozzle has a second flow area 4, wherein the first flow area is about five times greater than the second flow area. This can be seen in Fig. 1 for example wherein the nozzle includes five flow paths, one of which is considered to be the second flow area.

Allowable Subject Matter

4. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments, see pages 4-5, filed 11/04/08, with respect to the rejection(s) of claim(s) 1 under Beller have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Beller in view of Hurlimann.
